

PERSONAL WEB SITE CHECKLIST

Due: May 15, 2003

You do not have to turn in a checklist for the personal web site, but you may want to check yourself off here.

- If another format has not been negotiated, the web site includes
 - An index page (the page that the viewer will see first)
 - A resume
 - At least two work samples
 - At least 10 links to sources relevant to consumer behavior.
- All files are either HTML or Adobe Acrobat (PDF). There should be no word (DOC), PowerPoint (PPT), or Excel (XLS) files.
- Any content on the site has been created by you unless credit is given explicitly.
- The site complies with copyright laws.
- The URL (web site address) has been e-mailed to the instructor at lars.perner@ucr.edu.
- If more than 80% (160/200) are attempted, something unique beyond the minimal content expectations is included.
